

Dear Colleagues:

JET is a refereed journal published semi-annually, in spring and fall, by the Engineering Technology Division (ETD) of the American Society for Engineering Education (ASEE) and is indexed by the Engineering Index (EI) Compendex, the Science Citation Index Expanded (SCIE), Scopus, ProQuest, and EBSCO. The journal was first published in 1984 and has become one of the major publication venues of refereed scholarly works for engineering technology educators.

As the Manuscript Editor, I am inviting you to submit your unpublished manuscripts for publication. The journal invites manuscripts in several areas:

- Engineering Technology Education
- Innovative pedagogy
- Active learning
- Capstone projects
- Applied research
- Classroom activities
- Curriculum design
- Distance learning
- Industry partnership
- Assessment
- Accreditation
- Laboratories
- Non-technical and soft skills

and other topics related to engineering technology education and research.

Manuscript Requirements The typed, single-column, double-spaced manuscript should be submitted as in Microsoft Word. The manuscript should include the following:

- Title page
- Brief abstract
- Content with appropriate headings and subheadings
- Consecutively numbered pages
- Titled and numbered figures and tables
- Complete references (Chicago style)
- Proper metric (SI) units

Please prepare and organize your manuscript according to the **JET Author's Guide** (<http://www.engtech.org/wp-content/uploads/2016/05/JET-Authors-Guide-2017.pdf>) before submission. The manuscript must have a **research component**, have **applications to engineering technology** and written in **scholarly tone**.

To facilitate blind peer reviews:

- The title page, abstract, and manuscript text should not include names of authors.
- The organizational affiliations of authors should be removed from the title page and should be eliminated from the abstract and text wherever practical.

Manuscripts published in another journal or conference proceedings must be substantially different to be published in the Journal of Engineering Technology. If the manuscript is accepted for publication, the corresponding author will receive further instructions for format, graphics, biographical sketches of authors, etc. to meet publication requirements. Authors of accepted manuscripts are asked to pay page charges of \$75 per journal page. (A printed page of text contains approximately 750 words. The space required for tables and figures should be added to obtain a page estimate.) The page charge includes two complimentary copies of the issue in which the article is published.
